Education in Emergencies (EiE) & INEE Alignment

Growth Nexus
Capacity Building Hub

Service Overview

Specialized Education in Emergencies Support

Education in Emergencies (EiE) requires specialized knowledge to ensure continuity, safety, and quality.

This service provides targeted technical assistance to align your education programs with the global Inter-Agency Network for Education in Emergencies (INEE) Minimum Standards and build local capacity for conflict-sensitive programming.

The service' s price will reflect the specialized, high-risk nature of safeguards compliance, adopting the user's suggested price point.

Ideal Client

Education Cluster partners, local and international NGOs, and school administrations operating in conflict-affected areas who need to ensure their programs are safe, relevant, and compliant with global best practices.

Driving resilient results through strategic policy and rigorous project management.

How to Engage

- **Submit Request:** Describe your current program and the specific EiE challenge you are facing.
- **Confirmation:** We confirm the appropriate package and timeline (7-14 days) within 24 hours.
- **Delivery:** Receive the customized deliverables and a remote consultation session.

INEE Minimum Standards Alignment

A gap analysis and action plan to align your current education program design, implementation, and monitoring with the INEE Minimum Standards.

EiE Training Package

A customized, ready-to-deliver training package (slides, facilitator notes, participant handouts) for teachers, principals, or NGO staff on a chosen EiE topic (e.g., Psychosocial Support, Safe School Planning).

Safe School Planning Tools

Templates and guidance for developing a context-specific Safe School Plan, including risk assessment tools and emergency response protocols.

Conflict-Sensitive Education Review

A review of curriculum or program materials to identify and mitigate potential risks of exacerbating conflict or exclusion.

Incident Reporting & Referral Flow Charts

Development of clear, easy-to-follow flow charts for incident reporting (e.g., child protection, security) and referral pathways.
